- Clock: On main display
- Display Type: VFD display
- OSD Languages: English, Simplified Chinese
- Indications: DIM mode

Accessories
- Included Accessories: Guarantee booklet, Composite video cable (Y), FM antenna
- Remote control: 49-key with 2xAAA batteries
- IFU / User Manual: English, Simplified Chinese
- Quick start guide: English, Simplified Chinese

Dimensions
- Center speaker dimensions (W x H x D): 358 x 183 x 130 mm
- Packaging dimensions (W x H x D): 1190 x 375 x 475 mm
- Set dimensions (W x H x D): 248 x 109.5 x 307 mm
- Subwoofer dimensions (W x H x D): 200 x 221 x 330 mm
- Surround Speaker dimensions (W x H x D): 250 x 1117 x 250 mm
- Weight incl. Packaging: 20 kg

Power
- Power supply: 220V, 50Hz

Product highlights

DTS Digital Surround
DTS delivers superior surround sound with your DVD movies.

Dolby Pro Logic II Surround
Dolby Pro Logic II is an advanced matrix decoder that derives five channels of surround sound, including two full-range surround channels, from any stereo source.

Digital Sound Control
Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Progressive Scan
Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

USB direct
Simply plug in your USB device on the system and share your stored digital music and photos with your family and friends.

12-bit/108MHz video DAC
12-bit Video DAC is a superior Digital-to-Analogue-Converter that preserves every detail of the authentic picture quality. It shows subtle shades and smoother graduation of colors, resulting in a more vibrant and natural picture. The limitation of the usual 10bit DAC become in particular apparent while using large screens and projectors.
